- Played a key role in improving the **Keeladi Government Website's** front-end performance, ensuring **mobile responsiveness** and **cross-browser compatibility**.
- Contributed to the successful launch of the website, which serves as a key digital presence for the **Keeladi archaeological site**.
- Collaborated with a cross-functional team to ensure a user-friendly interface and high-quality, accessible design.

Professional Experience

Freelance Frontend Developer (April 2024 – Present)

- Developed and delivered responsive web applications using **React.js, Redux, REST API integration, and SEO optimization**.
- Specialized in **responsive design, image optimization, and user-friendly interfaces** to enhance performance and accessibility.
- Managed **hosting, domain setup, and website maintenance** for multiple clients.

Freelance Projects

1. Cuckoo Images – Graphic Design & Branding Agency

Client: Kathir Arumugam | Website: www.cuckooimages.in

Description:

Cuckoo Images is a **creative design agency** specializing in **graphic design, branding, and digital marketing**. The company provides **customized design solutions** for businesses, including **logo creation, promotional materials, and visual storytelling** to enhance brand identity.

Technologies Used:

React.js, Redux, REST API, Responsive Design, Image Optimization, Php, SQL.

Role & Responsibilities:

- Developed a **fully responsive** website to showcase the agency's portfolio and services.
- Implemented **dynamic image optimization** for fast-loading galleries.
- Integrated **REST APIs** for content management and smooth user experience.
- Designed an **intuitive UI and UX** to highlight the agency's branding expertise.

2. Kaarunya Bharathi Arts – Drawing & Fine Arts Academy

Client: Venkatesh | Website: www.kaarunyabharathiarts.com

Description:

Kaarunya Bharathi Arts is a **renowned art academy** offering **professional drawing, painting, and fine arts training**. The institution nurtures artistic talent through **structured courses, workshops, and exhibitions**, helping students develop their creative skills.

Technologies Used:

React.js, Responsive Design, SEO, Website Maintenance, Hosting & Domain Management.

Role & Responsibilities:

- Developed a **static yet interactive** website to represent the academy's courses and activities.
- Implemented **SEO best practices** to improve search engine ranking and visibility.
- Provided **domain setup, hosting, and ongoing maintenance** to ensure smooth operation.

3. Keeladi Museum Website – Government Archaeological Project

Client: Govt. of Tamil Nadu | Website: keeladimuseum.tn.gov.in

Description:

Keeladi Museum is a **historical and archaeological exhibition center** dedicated to showcasing **artifacts, ancient inscriptions, and research findings** from the Keeladi excavation. The museum serves as an **educational platform** highlighting Tamil civilization's rich cultural and historical heritage.

Technologies Used:

React.js, Redux, Responsive Design, Image Optimization, SEO

Role & Responsibilities:

- Designed and developed a **static website** for a government-backed museum.
- Optimized **images and assets** for faster load times and better accessibility.
- Integrated **SEO techniques** to enhance online visibility and attract more visitors.

4. PIXLVFX – Visual Effects & Animation Studio

Client: Karthik | Website: pixlvfx.com

Description:

PIXLVFX is a **leading visual effects and animation studio** specializing in **CGI, digital compositing, and motion graphics**. The company collaborates with **film productions, advertising agencies, and digital content creators**, delivering high-quality visual storytelling.

Technologies Used:

React.js, Responsive Design, Image Optimization, SEO

Role & Responsibilities:

- Built a **high-performance** website to showcase PIXLVFX's services and project portfolio.
- Implemented **image optimization techniques** for seamless visual rendering.
- Enhanced **website responsiveness and SEO** to improve user engagement and reach.

5. Wax Museum Ticket Booking System (Confidential Project)

Description:

A **ticket booking system** designed for **museum staff at the ticket counter** to efficiently manage and process visitor entries. The system allows counter staff to **issue tickets, calculate prices, and manage bookings** seamlessly.

Technologies Used:

HTML, CSS, JavaScript, Responsive Design, Php, SQL

Role & Responsibilities:

- Developed a **user-friendly** interface for ticket counter staff to process bookings efficiently.
- Implemented **dynamic pricing calculations** and ticket issuance features.
- Ensured **cross-browser compatibility** and **responsive design** for smooth operation on different devices.
